

Toshiba Carrier (Thailand) Co., Ltd is a joint venture between Toshiba Carrier Corporation headquartered in Kawasaki, Japan and United Technologies (UTC) headquartered in Farmington, United States. Since its establishment in 1999, Toshiba Carrier Thailand has been a manufacturing base to produce various types of air-conditioning equipment in Toshiba and Carrier brands for the customers in more than 50 countries including Asia Pacific, Japan, Europe, Middle East, Africa and North & South America. The company incorporates Toshiba's advanced air-conditioning expertise and UTC's strong marketing and distribution network, integrating strong Thai capabilities in manufacturing and supply chain.

History

TCTC Management Policy

As good citizens of the earth, we will achieve the following:

1. To contribute to the human society and the global environment
2. To conduct business activities by adhering to the voices of the customers
3. To ensure a sound and transparent business management

TCTC Management Vision

Toshiba Carrier (Thailand) Co., Ltd., with heat pump technology as its backbone, will strive to become an environmentally creative company to contribute to the society and the global environment and to grow globally by offering highest-quality products and services which properly serve various needs of the customers.

TCTC Slogan

Sustainable sales and profit growth driven by full line-up of energy saving, environmental conscious and eco-friendly (3e) climate control solutions.
